LISTING OF CLAIMS

1. (Withdrawn) A method of producing a composite nonwoven laminate comprising the steps of:

(a) providing an elastic sheet comprising a polymeric blend of an elastomeric polyolefin having a density of less than about 0.885 g/cm^3 and a nonelastomeric polyolefin having a density of at least about 0.890 g/cm^3;

(b) elongating said elastic sheet;

(c) joining the elongated elastic sheet to a gatherable polymeric web at spaced-apart locations; and

(d) relaxing said elongated elastic sheet so that the gatherable polymeric web is gathered at said spaced-apart locations.

2. (Withdrawn) The method of claim 1 wherein said elastomeric polyolefin comprises a narrow molecular weight distribution polyolefin.

3. (Withdrawn) The method of claim 2 wherein said narrow molecular weight distribution polyolefin is a narrow molecular weight distribution polyethylene.

4. (Withdrawn) The method of claim 1 further comprising the step of joining the elongated elastic sheet to an additional gatherable polymeric web at additional spaced-apart locations.

5. (Withdrawn) The method of claim 1 wherein said gatherable polymeric web comprises a coformed nonwoven web.

6. (Withdrawn) The method of claim 5 wherein said coformed nonwoven web comprises cellulosic fibers and polypropylene fibers.

7. (Withdrawn) The method of claim 4 wherein both said gatherable polymeric webs comprise coformed nonwoven webs.

8. (Withdrawn) The method of claim 7 wherein said coformed nonwoven webs comprise cellulosic fibers and polypropylene fibers.

9. (Original) An elastic nonwoven web comprising a composition having a blend of two components wherein one of said two components comprises an elastomeric polyolefin having a density of less than about 0.885 g/cm^3 and the other of said two components comprises a nonelastomeric polyolefin having a density of at least 0.890 g/cm^3, wherein said elastomeric polyolefin component is present in said

composition in an amount of from about 90% to about 10% and said nonelastomeric polyolefin component is present in said composition in an amount of from about 10% to about 90%.

10. (Original) The nonwoven web of claim 9 wherein said elastomeric polyolefin is a narrow molecular weight distribution polyolefin.

11. (Original) The nonwoven web of claim 9 wherein said elastomeric polyolefin is a narrow molecular weight distribution polyethylene.

12. (Original) The nonwoven web of claim 9 wherein said elastomeric polyolefin is a narrow molecular weight distribution polyethylene and said nonelastomeric polyolefin is a polyethylene.

13. (Original) The nonwoven web of claim 9 wherein said elastomeric polyolefin has a density of between about 0.860 g/cm^3 and about 0.880 g/cm^3 and said nonelastomeric polyolefin has a density of between about 0.900 g/cm^3 and about 0.920 g/cm^3.

14. (Original) The nonwoven web of claim 9 wherein said elastomeric polyolefin has a density of between about 0.863 g/cm^3 and about 0.870 g/cm^3 and said nonelastomeric polyolefin has a density of between about 0.900 g/cm^3 and about 0.917 g/cm^3.

15. (Original) The nonwoven web of claim 9 wherein said elastomeric polyolefin has a density of between about 0.863 g/cm^3 and about 0.870 g/cm^3 and said nonelastomeric polyolefin has a density of between about 0.900 g/cm^3 and about 0.910 g/cm^3.
